BASED IN
Riyadh, Saudi Arabia

WHAT I BUILD

- AI automation
- Dashboards and internal tools
- POS and Zoho integration
- Websites and 3D scroll stories
- AI image and video pipelines

TOOLKIT

Front end and 3D

JavaScript · TypeScript · React · Next.js · Three.js · WebGL / GLSL · GSAP · Tailwind CSS · Vite

Back end and data

Python · Django · Node.js · PostgreSQL · Redis · Docker · Linux · Zoho · Stripe

AI, 3D and media

Claude · Gemini · ONNX · PyTorch · OpenCV · Hugging Face · FFmpeg · Blender

Workflow

Git · GitHub Actions · Figma · Cloudflare · Vercel · Netlify

LANGUAGES

Bangla

English

Kintsugi mends a broken bowl with gold, so the repair becomes the most beautiful part. I build software the same way: careful, visible, made to last.

Afran Hossain Arif

AI Architect · Creative Developer

I build AI systems that run a business's daily work, and web experiences that make a brand look as good as it is.

PROFILE

AI Architect at Enmasco since 2023. For finance teams, I build the software behind the daily numbers: reconciliation, approvals and accounting entries they can trust. For brands, I build websites that move, with scroll-driven 3D, real-time shaders and CSS 3D that run fast on any phone.

EXPERIENCE

AI Architect

May 2023 – Present

Enmasco · Saudi Arabia

- Designed and built the POS reconciliation platform that replaces an n8n and Google Sheets workflow; now rolling out.
- Automated bank-statement import and matching to POS settlements; anything unusual goes to a person to review.
- Built review-before-posting: a person checks each settlement before it becomes a Zoho Books entry, with void, re-post and edit.
- Added two-factor sign-in, per-person roles and an audit trail of who did what and when.

`Django` `Zoho Books API` `2FA + audit trail` `0 Google Sheets`

SELECTED WORK

Kintsugi — 2026

Scroll-driven 3D portrait

A photograph that cracks from the heart, shatters into dust and is rebuilt with gold in the seams, and mends again as you scroll back.

`Three.js · GLSL · Vite · ONNX`

Lumen — 2026

Concept exhibition site

A scroll-driven 3D story of five rooms, then visitor pages with timed ticket booking.

Chhaya — 2026

Concept studio website

A concrete corridor in pure CSS 3D; six projects open with plans and sections.

Vesper — 2026

Concept fragrance store

A live liquid shader, then a working bag, checkout and scent finder.

Inkwell — 2026

Concept app launch

A poem of 5,800 ink particles, then pricing, a waitlist and your own word in ink.

HOW I WORK

01 — A short call
How the work runs today, and where it hurts.

02 — A clear proposal
Scope, timeline and cost in writing, up front.

03 — Weekly demos
Working software every week, no surprises.

04 — Launch & care
Handover, training and help after go-live.
